

CONSERVATION COMMITTEE

Charter

The Conservation Committee is an Adhoc committee established to assist the Board of Directors in determining energy and water efficiencies which would result in savings to our Golden Vista community and lessen the impact on our environment. The committee will consist of 6 – 8 members with the option to form sub-committees in or outside the parent committee structure. The sub- committees will report back to the Conservation Committee.

Duties

- 1) To meet every two weeks during peak season or as required
- 2) To research benefits of any energy conservation system that could benefit our community including solar, water heating, lighting, electrical, propane and natural gas.
- 3) Contact manufacturers, suppliers, specialists and educational institutions for the purpose of obtaining information, updates and costing
- 4) Report findings and make recommendation to the Board for further action.
- 5) Prepare estimates on project costing and recommend to the Resort Manager with specifications for bids and major contracts
- 6) Prepare annual report.
